The origins of PoorDoge

We are Anonymous.

We are Legion.

We do not forgive.

We do not forget. Expect us.

…

We are motivated by anger – not to attack, but instead to
protect and to salvage from the world.

What is PoorDoge?

Money laundering and awful inside stories make the world of Crypto, where the poor are at the mercy of others. After witnessing all of this, we decided we could no longer stand idly by…

Do not think that we turn a blind eye to this issue. Poor people exist not to be overpowered. The existence and consensus of PoorDoge, coupled with its merciless mechanism, can deter any individual from manipulating currency prices through the use of a sizeable amount of capital. If such a strategy is carried out by these individuals, the poor will eliminate everyone else, and these individuals will be tragically extirpated.

Regardless of your skin colour, where you come from, or your education level, if you are currently poor and in distress, then you are welcome. We focus on equality, unity, consensus, and mutual help. Help the poor and yourself to eradicate all forms of money laundering and selfish capital. This is PoorDoge, the great revolution.

Tokenomics

1 – A continuous Usdt income

Hold PoorDoge, you can directly receive Usdt dividends. Poor people can also receive an income every day during PoorDoge's growth period. Of course they can also choose to purchase again. At the same time, it can also effectively prevent people from selling PoorDoge through dividends, as a way of gaining from profitable arbitrage. For more details, see the distribution of taxes and fees incurred in the process.

2 – The black hole of the rich

We hope to help the poor. We refuse to allow the rich to join and to allow wealth accumulation for financial titans. If the rich insist on buying a large amount of PoorDoge to earn a profit, they must pay exorbitant taxes and must provide financial aid for the poor.

2.1. For each address, if you buy too many PoorDoge in one day, you will have to pay more extra fees.The specific tax tiers are:

Cumulative purchase amount of a single address single day / Taxes

0~10000 Usdt	0%
10001~30000 Usdt	8%
30001~100000 Usdt	20%
100001~300000 Usdt	35%
300001 or above	49%

The formula:

Including the amount of this transaction that was purchased (Usdt)=z

buy fee=

IF(z>300000,49%,IF(z>100000,35%,IF(z>30000,20%,IF(z >1000 0,8%,IF(z>0,0%)))))

2.2. Example:

An address purchased 10000 Usdt on the same day, and this order only charges the basic 0% fee = 0 Usdt. The individual then purchases 20000 Usdt again on the same day, so the cumulative purchase order will be 30000 Usdt on that day. Then will be taxed 20000*8%=1600 Usdt..

If he purchases 70000 Usdt on the same day again, the cumulative purchase order will then reach 100000 Usdt on the same day. Then taxed 70000*20%=14000Usdt.

This cumulation continues in one day

2.3. The cumulative purchase amount of each address reset to 0 at 0:00UTC every day.

3 – Mutual assistance for the needy

Our initial motivation is to help the less fortunate people who are in need of financial aid. For example, charity relief and operations all require funds to be able to be executed. As majority of our users are poor, only 10% taxes and fees will be charged for selling orders, and these taxes will be used for relief operations induced by wars, diseases, famine. These funds will be transferred to children or any poor individual who needs the help. However, should these emergency funds

be robbed by malicious capitalists, then they will pay a painful price. Continue below.

4 - A paradise for the poor

We do not want wealthy institutions or organizations to manipulate the market and potentially rob the poor. We wish to only provide wealth accumulation for the poor. We also emphasise on the long-term stability as the primary goal of this project, instead of short-term profits where buyers leave after making profits in a short period of time.

4.1. Take the price per minute of 1440 minutes (within 1 days) combined with the historical benchmark price to obtain the current benchmark price. If the current currency price equals to 120% of the benchmark price, then selling PoorDoge will incur a 20% charges for taxes, and will be used to fund all other poor holders.

4.2 After reaching 120% of the benchmark price, the tax rate will increase by 0.4% every time the current price exceeds the benchmark price by an additional 1%. (For example, when the benchmark price is 125%, the tax rate is 22%). The maximum sales tax rate will not exceed 46%.

The formula:

benchmark price=x, current price=y

x = Benchmark price as of the last minute / launch minutes (highest 1440)*(launch minutes-1)+y/launch minutes (highest 1440)

Selling fee =

max(10%,min(46%,if(y>=x*120%,(20%+(y/x-120%)*0.4),if(y<=x*90%,(20%+(90%-y/x)*0.8)))))

4.3. Example:

If the current benchmark price is 0.0001 Usdt and if the current currency price is 0.00012 Usdt, then any seller will have to pay 20% taxes. **But when the benchmark price gradually approaches 0.00012, then the tax is only 10%.**

4.4. The official website refreshes the benchmark price and current price every 1 minute, address: www.poordoge.org

5 – The consensus of the poor

When the selling volume is too large, all selling orders will incur additional taxes. In order to protect the interests of the poor, our goal is to punish those wealthy who pretend to be poor, and purchases at this time will receive Usdt rewards.

5.1. Take the price per minute of 1440 minutes (within 1 days) combined with the historical benchmark price to obtain the current benchmark price. If the current currency price equals to 90% of the benchmark price, then selling PoorDoge will incur a 20% charges for taxes, and will be used to fund all other poor holders.

5.2. For every additional 1% that is lower than the base price, the tax rate of additional 0.8% is added (if it is 85% of the base price, the tax rate is 24%), and the tax rate does not exceed 46%.

The formula:

benchmark price=x, current price=y

x = Benchmark price as of the last minute / launch minutes (highest 1440)*(launch minutes-1)+y/launch minutes (highest 1440)

Selling fee =

max(10%,min(46%,if(y>=x*120%,(20%+(y/x-120%)*0.4),if(y<=x*90%,(20%+(90%-y/x)*0.8)))))

5.3. At the same time, all buy orders will get USDT will be obtained from the prize pool based on 8% of the order amount. For every additional 1% below the base price, an additional 0.3% USDT will be awarded, the highest 20% .

The formula:

benchmark price=x, current price=y, purchase amount (Usdt)=z

Purchase bonus USDT =

min(20%,if(y<=x*90%,8%+(90%-y/x)*0.3))*z

5.4. Example:

If the benchmark price is 0.0001 USDT, and if the current currency price is 0.00008USDT, then a seller will have to pay 28% for taxes. **But when the benchmark price gradually approaches 0.0001, then the tax is only 10%.**

If you purchased 100 Usdt Poordoge at this time, you will get 100*11%=11 Usdt rewards will be obtained from the prize pool, which will be automatically sent to the buyer's wallet after the purchase is successful.

5.5. The official website refreshes the benchmark price and current price every 1 minute, address: www.poordoge.org

6 – Encouragement of the poor

In order to sustain and strengthen the support for these projects that help the poor, a prize pool will be provided.

6.1. The prize pool is settled by Usdt;

6.2. If no one buys PoorDoge for 4 hours, then the last individual who purchased PoorDoge before the said time will receive half of the Usdt reward in the prize pool (if there is 100,000 Usdt in the prize pool, the winner will get 50,000 Usdt);

6.3. During the countdown period, once an individual purchases PoorDoge, the countdown will restart for 4 hours until the countdown reaches 0. The reward will then belong to the last individual who purchased PoorDoge.

6.4. The reward will be automatically sent to the winner's wallet.

6.5. If no one can claim the reward, after 120 hours, 50% Usdt in the prize pool will be used to buy back Poordoge and burned.

6.6 The official website will count the total amount of the current prize pool, countdown, address: www.poordoge.org

7 – Decapitate the shady

In order to prevent wealthier individuals from transferring Poordoge and manipulating market prices, the number of PoorDoge sold at a time will be limited, so as to avoid selling too many PoorDoge based on the same free.

7.1. A single address can sell a maximum of 10,000,000,000 PoorDoge in a single transaction.

Token Information

Project: PoorDogeCoin

Token: POORDOGE

Contract Address:
0x4a5eb6574Fe68c55362fc73b9EA76953d837985B

Total supply: 70,000,000,000,000

Initial Distribution

Team & Charity Funds

0%

Liquidity
12% (8,400,000,000,000)

Pre-sale
18% (12,600,000,000,000)

Black Hole
39% (27,300,000,000,000)

Cross-Chain launch

18.88% (13,216,000,000,000)

Locked, will be released in 6 years, 0.79% will be
released every 4 months after going online, used for
cross-chain sale, cross-chain Liquidity, if there is no
subsequent cross-chain plan, then burned.

V2 snapshot airdrop

12.12% (8,484,000,000,000)

Tax Distribution

Each tax received will be distributed according to the
following proportions:

Dividends for holders (Usdt)

30%

Prize Pool Wallet (Usdt)
25%

Burn (PoorDoge)

20%

Team & charity wallet (PoorDoge)
25%

For example:

Buys or sells 1,000,000 PoorDoge worth of 1,000 Usdt

And if the tax at the time was 5%,

1 All token holders dividends

  15 Usdt (1,000*5%*30%)

2 Prize pool wallet

  12.5 Usdt (1,000*5%*25%)

3 Burn
  10000 Poordoge（1,000,000*5%*20%）
4 Team & charity wallet

  12500 Poodoge (1,000,000*5%*25%)

5 Buyers can receive 950,000 PoorDoge / sellers can
receive 950 USD

Roadmap

Look at all that talk of a shit MAP, do you still believe them?

The Anonymous does not need these at all, we only focus on the present.

PoorDoge is to resist the capitalists and the wealthy individuals, so that they cannot exploit the poor.

So, you do not have to buy a lot or even buy any at all. Our goal is to reach out to and help around 700 million poor people in the world.

The Anonymous will also jointly create NFT games that are more suitable for the poor to play.

Wallet Address 500,000? The Anonymous believe that is too meagre an amount for the poor. List big CEX? For the sake of the poor across the world, they simply cannot ignore us. To the Moon? We place emphasis on help the poor people on earth become rich first.
